Pre Start Inspection

Some selected Equipment at Cordwells require that on the first use of the day that the operator complete a Pre Start inspection. using the Pre Start Inspection check sheet helps to assess the serviceability and safety of equipment before you use it. This can assist to uncover potential hazards or flaws due to misuse, wear and tear.

examples of equipment needing are:

- Bobcat (skid steer loader) and tractor
- Trucks (Concrete Delivery Trucks, Prim Mover and Trailers)
- Forklift
- Front end loader
- Batching equipment
- Dredge and Equipment
